Pump Control
Measure what matters most.

Satellite connectivity

Control your pumps from anywhere, anytime.

Farmbot's Pump Control gives you smart, remote control over your solar, diesel or mains-powered pump system. Set daily pump windows, start and stop from your device, or automate pump activity based on near real-time tank levels.
A hands-free solution that saves time and gives you peace of mind.

Pump Control

Remote Switch

Remote Powerpoint

Avoid overflow, extend pump life.

By replacing traditional pressure switches and basic timers, Pump Control offers greater visibility and precision. It helps minimise wear and tear on your infrastructure, cuts down on unnecessary travel, and gives you full control from wherever you are.

Whether you're managing tanks across long distances or simply want more reliable automation, Farmbot Pump Control makes your water management smarter and more efficient.

Key Features

- Ability to select a source and/or destination tank, and set custom water level thresholds.

- Save money by operating pumps off-peak or when solar power is abundant.

- Reduce wear and tear on pipes and pump systems by optimising run schedules, and avoiding the need for pressure switches.

- **Multiple control options:**

  Automatic Based on water levels in source and/or destination tanks.
  Remote Start and stop pumps via the MyFarmbot platform on your device.
  Manual Physical control button at the pump site.
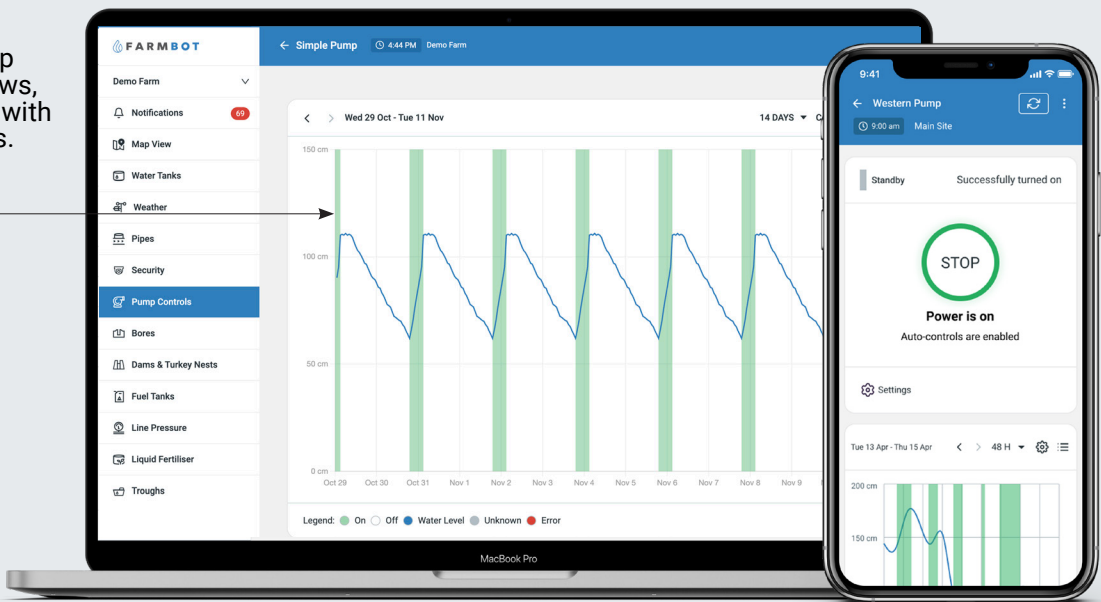

Technical Specifications

Remote Switch

- Switch control: DC/AC Signal (< 240V/2A), Normally Open/Closed
- Waterproof enclosure (IP67)
- Pump status feedback (feature available on request)
- 12m cable length
