

Xtend Tank

Measure what matters most.

Requires a Farmbot Monitor

Expand your water monitoring system with Farmbot's Xtend range.

Xtend Tank is a wireless sensor that connects additional water tanks within a 5km line of sight to your existing Farmbot Monitor. Ideal for less critical tanks, Xtend offers a smart, cost-effective way to scale your system. Quick to install, it's a solution for broader coverage with lower ongoing costs.

Xtend Tank

Requires a
Farmbot Monitor

Wireless expansion

The Farmbot Xtend Tank offers a robust, wireless solution for producers looking to expand their tank level monitoring capabilities.

Designed to connect with compatible Farmbot Monitors within a 5km direct-line-of-sight*, Xtend enables you to monitor up to 10 additional tanks with ease. By leveraging your existing Farmbot Monitor to transmit data, Xtend delivers near real-time, event-driven insights and alerts — helping you stay informed across more of your property.

* Direct line of sight between Farmbot Monitor and Xtend Tank is essential for the greatest transmission range.
