The Station Manager

One camera. Multiple angles. Full 360° visibility at your fingertips.

The Station Manager is an advanced pan, tilt and zoom camera solution designed to give producers greater visibility across your operation, no matter where you are. Via your device you can remotely rotate the camera up to 360°, scan key infrastructure including sheds, yards and paddocks, and zoom in on critical assets from up to 400m away in daylight hours.

With 100m infrared night vision, The Station Manager maintains visibility after dark for 24/7 monitoring. With Starlink or cellular connectivity options, it delivers reliable coverage for even the most isolated properties.

Connection types

Starlink: Perfect for properties with no cell coverage.

4G: Ideal for areas with mobile coverage, optional antenna upgrade for low reception areas.

Key Features

- 360° pan & tilt, controlled remotely from your phone.
- 400m optical zoom, check on assets from across the paddock.
- Instant motion alerts sent straight to your phone.
- Remotely view live and recorded footage.
